

# PROJECT EXAMPLE

## KOI POND

### MATURE POND

Note: Natural filtration system in hut.

### POND CHUTE

Note: 12" chute divides pond for ease of care.

### MAIN POND AREA

Note: Aquatic bench for plants.

### MAIN POND AREA

Note: Koi will eat from your hand.

### OBSERVATION WINDOW

Note: Koi seek out window observers.

### POND AERIAL

Note: Pond is 6 ft deep at deepest part.

**History** - Pond underwent extensive expansions and remodeling over a 20 year ± period where size of fish drove pond expansions to reach 10,000 ± gallons pictured here. Koi pictured here are in the 20 - 30 pound range where a "Pond Chute" was incorporated into pond design to allow for corralling koi into one end while opposite end of pond could be drained for maintenance.
