## SICK BUILDING SYNDROME – OUR INDOORS MUST BE HEALED TO KEEP AWAY THE SICKNESS

We spend more than 90% of our time indoors, but we do little to keep the indoor environment healthy. Mold spores, dust mite allergens, pollen and pet dander toxify the indoor environment. These allergens combined with germs and pathogens primarily brought in by visitors pollute and corrupt the indoor environment even further. They accumulate on indoor surfaces and since they are microscopic easily become airborne and inhaled resulting in allergic attacks and disease transmission.

Our bodies are constantly exposed to these germs thru touch or via inhalation. Our immune systems are overwhelmed resulting in skin, eye, lung inflammation and even disease transmission.

### **HVACS ARE MAJOR CONTRIBUTOR TO BUILDING ILLNESSES.**

HVAC systems are a significant contributor to building-related illnesses. The interior surfaces of the HVAC air ducts trap harmful micro-organisms and are breeding grounds for these pathogens which are spread everywhere each time the system cycles the air. .

### **E-Biotic Pro to the rescue! The magic is in the particles.**

The E-Biotic Pro is easily attached to your HVAC system and continuously disperses all-natural microscopic probiotic cleaning agents. The AI embedded sensors automatically adjust for the probiotic's efficient dispersion. The result is safe and efficient 24/7 bio-cleansing at the microscopic level for both the HVAC system and all interiors served by it.

# TRANSFORMING THE INDOORS TO SAFER, HEALTHIER, AND MORE PLEASANT AREAS

---

## BIOMIMICRY WELL EXECUTED: WE WATCHED AND LEARNED FROM MOTHER NATURE.

Beneficent probiotics have evolved in nature over billions of years to balance pathogenic microbial loads. As in nature, these probiotic agents consume organic substances such as protein waste, pollen, pet dander, dust mite fecal matter, viruses' enveloped shields, and mold spores, consequently limiting the growth of pathogens and eliminating the organic allergens.

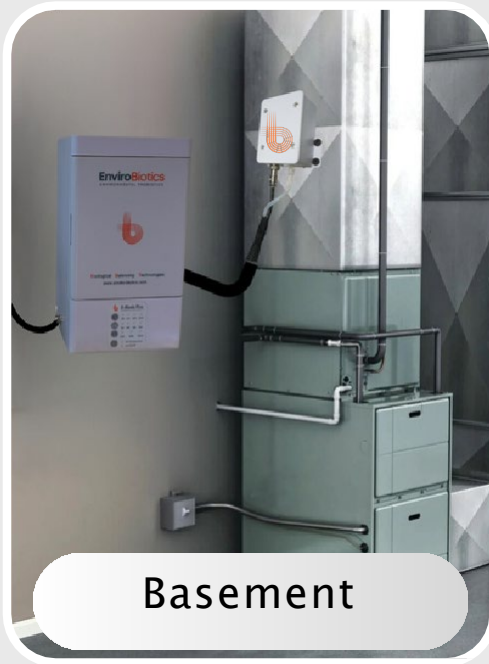

Upon dispersion, Enviro-Biotics form a protective microscopic layer that safeguards surfaces and objects by consuming needed food supplies that pathogens need to propagate and multiply.

## ENVIRO-BIOTICS IS THE RESULT OF A GLOBAL SCIENTIFIC COLLABORATION.

Hundreds of naturally occurring probiotic strains extracted from soil and plants in their natural habitat were thoroughly inspected. Only a handful that demonstrated total safety and efficacy were selected, creating the patented formula of Enviro-Biotics.

# E-BIOTIC PRO: EASILY INSTALLS EVERYWHERE

Basement

Living Room

## E-BIOTICS PRO

### DIMENSIONS

**Base:** 17.8W x 14D x 32 H (CM)  
**Remote:** 6.5 W x 4.5 D x 8.7 H (CM)

### SPECS

**INPUT-** 100-240V, 50/60HZ AC 1A  
**OUTPUT-** 12VDC-2A 24W

## E-BIOTIC PRO: TOTAL PROTECTION FROM A SINGLE DEVICE

**E-Biotics Pro** protects our indoor environment 24/7/365, making it healthier and more pleasant. It reduces all organic contaminants, including mold spores, organic allergens, bacteria, and viruses.

**E-Biotics Pro** protects your total indoor environment : Surfaces, Objects & Air.

**E-biotics Pro** reduces indoor contamination while fostering a robust immune system, our number one defense against infectious diseases and allergies.

## COST-EFFECTIVE SOLUTION

Detoxify and purify your entire indoor environment with a single affordable centralized device that effectively protects an area of up to 25,000 square feet.

A clean and purified HVAC System operates more efficiently thereby saving far more energy than the device consumes.

## CONTRIBUTE TO PROTECTING THE ENVIRONMENT.

All-Natural Probiotic based bio-cleansing eliminates the use of harmful detergents and chemicals, which are toxic, harming our health while polluting our soil, water, and air.

# EnviroBiotics

ENVIRONMENTAL PROBIOTICS

**TESTED AND REGISTERED WITH THE EPA  
STRONG GLOBAL ENDORSEMENTS & CERTIFICATIONS for your  
PEACE OF MIND KNOWING that YOUR SAFETY IS UNCOMPROMISED.**

Enviro-Biotics have been successfully tested for registration by the USA's EPA, while being certified by Allergy UK, Australian Sensitive Choice, and Chilean Ministry of Health, with additional endorsements from PTPA (Parent-Tested, Parent-Approved), MadeSafe, and others.

## YOUR HEALTH. YOUR CHOICE!

E-Biotic Pro disperses beneficial patented environmental probiotics 24/7/365, substantially reducing germs, mold, bacteria, viruses, and allergens on every surface object and air, consequently reducing the risk of illnesses and allergies.

The source of the particles we breathe are surfaces. Pathogens develop and prosper on surfaces where their nutrients exist. The

World Health Organization declares contaminated surfaces are the main source of illnesses. When surfaces are polluted so is the air !

Hence, filtering the air alone does not address the root cause of illness and allergies.

## YOUR **AIR**. YOUR **CHOICE**!

\*With mold and allergens reduced, so are the airborne toxins and microscopic harmful particles, resulting in fresher air without the bad odor created by the mold and pathogens.\*

# GLOBAL SUPPORTS 24/7/365 ANYWHERE:

Support of initial setup and follow on maintenance where we constantly monitor via Wi-Fi connection. Our asset management system monitors, analyzes and constantly reports to you the status of devices and your facilities.

## WIFI Connected Asset Management System

Allows remote control of devices

# E-BIOTIC HERALDS IN A NEW ERA OF BIO-CLEANSING OF THE INDOORS, WITH BENEFITS FOR YOU AND THE ENVIRONMENT:

•**Safe and healthier indoors, where we spend most of our time. Reducing allergens—the source of allergies—reduces the propensity for headaches, runny noses, red eyes, and Asthma attacks.**

•**Proactive way to reduce the development of mold toxins and other harmful pathogens.**

•**Boosting our immune system—A cleaner space reduces overload and allows the immune system to prosper, allowing it to deal more effectively with threats posed by pathogens that generate illnesses.**

•**Reduction of bad odor, naturally, no perfume masking, providing the restoration of cleaner air.**

•**Substitute the need for a dedicated device for every room with a single automated, easy-to-maintain centralized device that effectively protects an area of up to 25,000 square feet.**

•**Well-cleaned air ducts provide more efficient HVAC - save electricity and reduce maintenance. Contribute to our environment protection - Enviro-Biotics substitute the use of harmful chemicals that pollute our soil, water, and air; overuse of chemical cleaning is the leading cause for fostering microbial resistance and superbugs**

## **CONTRIBUTE TO PROTECTING THE ENVIRONMENT**

•**Probiotic-based bio-cleansing eliminates harmful chemicals that destroy our health and pollute our soil, water, and air.**

# CUSTOMER REVIEWS

Brooklyn Nets had a bad odor problem as well as a member of our staff experiencing the symptoms of sickness at our new facilities. We decided to install an E-Biotic. It eliminated the odor issues immediately while a member who was complaining about sickness hasn't complained since.

**Dan West, Operations Manager at Brooklyn Nets, NBA**

We have looked for solutions that increase safety of passengers and crew in our airport. We have tried numerous solutions and were unsatisfied; We engaged the local expert in Bangalore, IADFAC laboratories to assist in quantifying decrease of microbial load, and indeed their compilation certified for a significant reduction of pathogenic count across the treated facilities where consequently we initiates purchases of devices to cover a large part of airport halls

**Mohana P. Sundaram—General manager of engineering services  
Bangalore International Airport**

In the past 20 years, our company has designed and built thousands of elder care, assisted living, and Skilled Nursing Facility units. Before installing E-Biotic devices, visitors and crew members were stunned by the overwhelming odor of dirty adult diapers, mold and fungi to the point of gagging. three weeks after devices installation, it smelled like a brand-new building and the only odors were those of the home cooked lunch about to be served. Also, a bonus has been the HVAC energy cost savings and changing furnace filters that cut by half.

**Ben Ganther - Owner and CEO**

# TECHNOLOGY THAT IS ENDORSED BY HEALTH CARE PROVIDERS AND MEDICAL EXPERTS :

*During my tenure as a chair of the allergy department in the hospital, I have investigated the triggers that cause Asthma/Allergic Rhinitis attacks. The company approached me to supervise a double-blind study with children who suffer from Asthma that had been my patients. We have designed an active and a placebo group with identical exposure. These treated with Enviro-Biotics have over 53% improvement vs vs, the placebo group; such results are statistically significant evidence of the efficacy of the probiotics method*
